### DETAILED ACTION

This Office action is in response to Paper No. 4 dated March 3, 2003.

The amendment to the specification and to claims 1, 7 and 9-10 and the cancellation of claims 6 and 8 have been entered of record.

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 depends on claim 8 that has been cancelled. The claim will be treated on the merits as depending from claim 1. However, clarification to the record for claim 9 dependency is requested

The 102(b) rejection over Roof '647, Miller '450 and Jackson '672 are withdrawn in view of applicants' amendments to the claims and arguments made of record.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor

Art Unit: 1714

and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-5, 7 and 9-10 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Jackson 4,293,672 for reasons made of record in Paper No. 2 dated October 23, 2002.

Claims 1-5, 7 and 9-10 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Miller 4,654,450 for reasons made of record in Paper No. 2 dated October 23, 2002.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-5, 7 and 9-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2 of U.S. Patent No. US 6,495,065 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because the shortstopping

Art Unit: 1714

composition comprising a hydrophilic alkyl hydroxylamine and hydrophobic free radical shortstopping agent alkyl hydroxylamine of applicants anticipate and/or render obvious the composition for shortstopping free radical emulsion polymerizations comprising nitrosamine and wherein the shortstopped is diethyl hydroxylamine and or dibutylhydroxylamine of patentee.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5, 7 and 9-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 1 it is suggested that applicants should delete line 1 and insert the suggested language "A composition for shortstopping free radical emulsion polymerizations for clarity."

Applicant's arguments filed March 4, 2003 have been fully considered but they are not persuasive.

The objection to the specification is withdrawn in view of applicants' amendment to the specification.

Applicants' arguments in respect to the instant claim are not convincing of error in that the claims are directed to compositions and the intended use is not a part of the composition. The composition of Jackson renders obvious the set forth in the said reference.

Art Unit: 1714

Applicants arguments that Miller does not teach the hydroxylamines into the two classes based on the number of carbons in the dialkyl group is irrelevant in that Miller teaches that the preferred hydroxylamine includes diethyl hydroxylamine and dibutylhydroxylamine (col. 3, lines 11-14). Thus Miller clearly provides teachings directed to hydroxylamines rendering the instant claims obvious.
